**(54) Title:** METHOD OF INSTALLING A TERMINAL, AND A WIRELESS TELEPHONE SYSTEM

## (57) Abstract

The invention relates to a telephone system and a method of installing a terminal in the telephone system comprising a number of terminals (100, 102) and a management system (128) which controls and monitors the operation of the terminals having device-specific operational parameters set by the management system. To enable swift installation of the terminals, when a new terminal (128) is put to use in the system for the first time, the terminal sends the management system (128) a message indicating the terminal in question, and the management system starts controlling the terminal and sends the necessary operational parameters to the terminal on the basis of the message.
